Guide on Library web service

～PubMed and Scopus join the collaboration with LINK RESOLVER～

<Outline of Web services>

- You can **confirm your borrowing and reserving positions**, and **extend the borrowing period** on the Web.
- You can **make reservation of materials that somebody else are borrowing** on the Web.
- You can **order the copies of materials from holdings outside KPUM** on the Web.
  (You can easily apply, according to database search results)
- You can **confirm delivery status of your order** on the Web.
- **Collaboration with LINK RESOLVER**
  (This Web service is collaborated with Link Resolver)

"Link Resolver" is a tool that achieves linkage bridging material information database, electronic journal, our Library holdings search, and Web services, etc.

1. Easy link to electronic journals !

At the moment, a KPUM icon Find Full Text 京都府立医科大学 linking to Link Resolver is shown in PubMed, Ichushi Web and Scopus. **(In case of PubMed, access from our exclusive entrance)**
Clicking on the icon opens a window directly links to a thesis, if usable electronic journals are available !

2. Convenient for requesting materials photocopy to non-KPUM organizations !

(In case of PubMed, access from our exclusive entrance)
When search results by PubMed (in Abstracts) shows the KPUM icon Find Full Text 京都府立医科大学, a click on it displays availability of electronic journals within KPUM!
If electronic journals are not available, search Library holdings (OPAC Search) --->If it does not hit any, click on hyper link that reads <to materials photocopy> ---> Web Service Certification --->
Your application is completed without retyping PubMed search results.

□Registration is simple !

①Send application using the registration form posted on Library website.
http://www.f.kpu-m.ac.jp/k/library/web/index.html
Or fill out the application form, and bring it to Library's circulation counter.
②An initial password will be emailed from Library.
③Access the window to change password, and change the initial password to your favorite one.

WEB Service Application Form
